## THE OPEN UNIVERSITY OF SRI LANKA

## FACULTY OF EDUCATION

POSTGRADUATE DIPLOMA IN EDUCATION PROGRAMME - 2018/2019

FINAL EXAMINATION (PHASE I)- 2019

STP8303/ESP2103 - MEASUREMENT AND EVALUATION IN EDUCATION

**DURATION – THREE (03) HOURS** 

Date: 01st February 2020

Time: 9.30 a.m. - 12.30 p.m.

Answer All Questions in Part I and any three (03) questions from Part II.

Normal calculators (Not Scientific) could be used for basic mathematical calculations.

## Part I

- 01. Differentiate the concepts "assessment" and "evaluation".
- 02. Citing examples, explain the six (06) levels of cognitive domain.
- 03. What is the content validity of a question paper.
- 04. Citing an example explain in brief what is meant by a 'behavioural objective'?
- 05. What are the principal stages in the process of educational evaluation?
- 06. i. What is the 'skewness' of the distribution of marks?
  - ii. Explain using a diagram the positive skewness of a distribution.
- 07. Write five (05) aspects that should be considered in preparing a table of specification.
- 08. i. Explain what is meant by norm tables.
  - ii. Name two (02) different types of norms and describe one of them briefly.

## Part II

| 09. | (A) | i. Wł   | (02 marks)  |                                |  |  |  |  |  |  |
|-----|-----|---|---|--------------------------------|--|--|--|--|--|--|
|     |     | ii. Write three (03) advantages and three (03) disadvantages of an essay type test. |   |                                |  |  |  |  |  |  |
|     |     |   |   | (06 marks)                     |  |  |  |  |  |  |
| ٠   |     | iii.  | Suggest ways and means to minimize disadvantages of an es   | ssay type test.                |  |  |  |  |  |  |
|     |     |   |   | (02 marks)                     |  |  |  |  |  |  |
|     |     | iv.   | Write an essay type question and convert it into a structured                                     | essay test item.<br>(02 marks) |  |  |  |  |  |  |
|     |     | ٧.  | Write two (02) advantages of that conversion.   | (02 marks)                     |  |  |  |  |  |  |
|     | (B) | i.  | What do you mean by an objective type test?   | (02 marks)                     |  |  |  |  |  |  |
|     | ` ' | ii.   | Name four (04) types of items in objective type tests and go for each type.                       | ive an example                 |  |  |  |  |  |  |
|     |     |   |   | (04 marks)                     |  |  |  |  |  |  |
| 10. | (A) | i.  | Describe what is meant by affective development.  | (02 marks)                     |  |  |  |  |  |  |
|     |     | ii.   | Explain why it is difficult to measure affective development                                      | . (04 marks)                   |  |  |  |  |  |  |
|     |     | iii.  | Citing two examples justify the importance of evaluadevelopment in the teaching learning process. | ating affective<br>(04 marks)  |  |  |  |  |  |  |
|     | (B) | i.  | Discuss the difference between 'attitudes' and 'interests'.                                       |                                |  |  |  |  |  |  |
|     |     |   |   | (02 marks)                     |  |  |  |  |  |  |
|     |     | ii.   | Explain four (04) characteristics of an 'attitude'.   |                                |  |  |  |  |  |  |
|     |     |   |   | (04 marks)                     |  |  |  |  |  |  |
|     |     | iii.  | Name two (02) techniques used in the measurement of attituan example, explain one of them.        | ides and citing                |  |  |  |  |  |  |
|     |     |   |   | (04 marks)                     |  |  |  |  |  |  |

11. (A) i. What is 'Z-score'? (02 marks)

ii. Calculate the 'Z-score' corresponding to a raw mark 60 of a distribution in which arithmetic mean is 40, and standard deviations are 15.0.

(02 marks)

iii. Carefully study the scores of a student in three subjects and the other details given in the table below. Complete missing marks.

| Subject           | Score<br>of the<br>student | Mean of<br>the class | Standard deviation of the class. | Z-score | McCall's<br>scale<br>marks | Hull's<br>scale<br>marks |
|-------------------|----------------------------|----------------------|----------------------------------|---------|----------------------------|--------------------------|
| Mathematics       | 45                         | 50                   | 10                               | A       | В                          | С                        |
| First<br>Language | 60                         | 70                   | D                                | 2.00    | Е                          | F                        |
| English           | G                          | 46                   | 12                               | Н       | I                          | 64                       |

(09 marks)

iv. Comment on the relative performance of the student in the three subjects.

(02 marks)

(B) i. Explain what is meant by a socio-metric test, citing an example.

(03 marks)

ii. Write two (02) uses of a socio-metric test.

(02 marks)

12. (A) i. What are the measures of central tendency?

(02 marks)

ii. Explain why the mean is the best measure of central tendency for achievement scores.

(03 marks)

(B) Following are the marks obtained by 40 students in a class at a year end examination.

| 93 | 37 | 26 | 50 | 41 | 65 | 14 | 81 |
|----|----|----|----|----|----|----|----|
| 58 | 41 | 31 | 61 | 38 | 59 | 28 | 43 |
| 45 | 20 | 44 | 18 | 46 | 11 | 55 | 70 |
| 80 | 25 | 53 | 07 | 88 | 44 | 38 | 60 |
| 30 | 19 | 65 | 28 | 47 | 53 | 75 | 40 |

i. Prepare a frequency distribution for the above set of marks taking (37-48) as one of the class intervals.

(02 marks)

ii. Calculate the mode and median of this distribution.

(03 marks)

iii. Considering the assumed mean of the above set of marks to be in the class interval (37-48), calculate the arithmetic mean.

(05 marks)

iv. Calculate the standard deviation of the distribution of marks.

(05 marks)

13. (A) i. Explain the terms 'correlation' and correlation coefficient'

(04 marks)

ii. What is meant by perfect positive correlation.

(02 marks)

iii. Write three (03) uses of correlation coefficient.

(03 marks)

(B) i. Marks obtained by 10 students for the subjects Mathematics and Science at a year end examination are given below.

| Student     | A  | В  | С  | D  | E  | F  | G  | Н  | I  | J  |
|-------------|----|----|----|----|----|----|----|----|----|----|
| Subject     |    |    |    |    |    |    |    |    |    |    |
| Mathematics | 55 | 46 | 48 | 55 | 49 | 47 | 44 | 58 | 47 | 46 |
| Science     | 58 | 44 | 42 | 51 | 47 | 49 | 50 | 52 | 51 | 51 |

i. Calculate the Pearson's product moment correlation coefficient for above marks.

(09 marks)

ii. Interpret the value obtained for the correlation coefficient.

(02 marks)

14. (A) i. State three (03) characteristics of a normal probability curve.

(03 marks)

ii. Explain how the normal probability curve is used for grading marks.

(02 marks)

- (B) Marks obtained by 2500 students in an examination are distributed according to the normal probability curve. The arithmetic mean and the standard deviation of the distribution are 40 and 15 respectively.
  - i. Find the number of students who scored between 35 and 55 marks.

(05 marks)

ii. If the best 10% of the students are expected to be given A grade, what is the minimum mark required to obtain an A grade?

(05 marks)

iii. If 65% of the students are to be passed the examination, calculate the cutoff mark for passing the examination.

(05 marks)
