PART 1: Compulsory Case Study (40 Marks)

Question 01. Case Study

Service Transformation at Medica Hospitals (Pvt) Ltd

Medica Hospitals (Pvt) Ltd is a growing private healthcare chain in Sri Lanka, operating four multi-specialty hospitals and five outpatient clinics in urban and suburban areas. The hospital has built its brand around affordable, quality healthcare services and introduced several digital services such as e-consultation, online appointment booking, and an electronic medical records system.

Despite these initiatives, recent customer feedback shows dissatisfaction in key service areas: long waiting times even for scheduled appointments, unfriendly support staff, lack of follow-up care after discharge, and confusion regarding billing and insurance claim procedures. While the hospital uses social media and a website for promotion, many patients feel it lacks personalized care and effective communication.

In response, the management launched a **"Patient Experience Excellence Program"**, which includes:

- Customer service training for front-desk and nursing staff
- Redesigned hospital environments to reduce stress and improve wayfinding
- Launch of a mobile app for appointment tracking and live chat with doctors
- Improved billing and discharge procedures
- Introduction of patient loyalty and feedback programs
